

Cove Apple Club

February 23, 2011

Tonight's Topics

— [Apple in the news

— [Extract that video!

— [Clean My Mac

— [Three things you didn't know you could do with DropBox

March

2

Come see what 2011 will be the year of.

Please join us for an invitation-only event at the Yerba Buena Center for the Arts Theater in San Francisco on ~~March 7~~ March 7 at 10:00 a.m. Registration begins at 9:00 a.m. Please arrive early.

Apple in the news

— [iPad 2 Media Event next Wednesday; Apple sent invites late today as expected; YBCA, site of 2010 iPad announcement; invitation leaves little doubt

— [MacBook Pro refresh tomorrow? LightPeak/ThunderBolt?

— [Apple patent application for "Safe Deposit Box" - coming in Lion?

Safe Deposit Box

Apple Working on a New OS X Feature: The Virtual Safe Deposit Box

FIG. 2

FIG. 3

Patently Apple

Apple in the Sky with Diamonds: A Cloud Based Safe Deposit Box

Patently Apple

Watson humiliates humans

— [Watson wiped the studio floor with Jennings & Rutter

— [Wildly wrong on Final Jeopardy! answer and a few others, but astounding overall

— [Final totals: \$77,147 (Watson); \$24,000 (Jennings); \$21,600 (Rutter)

— [All of \$1-million prize money donated by IBM to charities

Tablet Competition Update

Steve on Flash, April 2010:

In addition, Flash has not performed well on mobile devices. We have routinely asked Adobe to show us Flash performing well on a mobile device, any mobile device, for a few years now. We have never seen it. Adobe publicly said that Flash would ship on a smartphone in early 2009, then the second half of 2009, then the first half of 2010, and now they say the second half of 2010. We think it will eventually ship, but we're glad we didn't hold our breath. Who knows how it will perform?

Steve Jobs, "Thoughts on Flash," April 10, 2010

Since then...

— [Apple has delivered 14,000,000 iPads to customers in 35 countries since last May

— [Apple delivered 80,000,000 iPhone/iPod Touch/Apple TV devices in 2010, all running iOS, none with Flash

— [Apparently, not having Flash is not keeping Apple's mobile products from selling like hotcakes

Samsung Galaxy Tab

— [Shipped 2,000,000; no word on sell-**through**

— [7-inch screen, running Android 2.2 “FroYo” (older version, not tablet-optimized, has Flash Player 10.1)

— [\$499 from Verizon

— [Have you actually seen one in the wild?

— Me neither.

Motorola Xoom on Verizon

— [10.1-inch dual-core Android 3.0 “Honeycomb” tablet ships tomorrow

— [“Fully Flash-enabled for video-rich Web” says the big print on the Verizon site

— [\$599 for Wi-Fi only; \$799 for Wi-Fi + 3G (32Gb)

— iPad is \$599 & \$729, respectively (32Gb)

Whaaaaat?!

iPad Web site

This is what the iPad Web site looks like on an iPad, and has since last May. For \$499.

Xoom Web site

This is what the Xoom Web site video will look like on the Xoom tomorrow.
For \$800.
Nice.

Extract That Video!

Problem:

— [You found a cool/interesting/historically significant video on a Web site

— [That page may go away or change over time

— [You'd like to keep a local copy of the video for archive or documentary purposes

Complications:

- [No obvious way to download just the video file
- [Video file may be in any of several formats: mov, mp4, flv

Solutions:

- [Web-based extractors:

- KeepVid.com: supports many formats & most popular video sharing sites
- DownloadYouTubeVideo.org: Only supports Flash videos from YouTube

But...

— [Many videos are hosted on other sites, like Apple.com, CNN.com, CBSNews.com, etc.

— [No rhyme or reason to the method of extraction or video format

Safari Developer Mode to the Rescue!

Demo

Clean My Mac

Hey, hang on a minute!

— [Aren't we Mac users pretty smug about not needing any expensive, cycle-hogging, system-slowing maintenance software?

— [Doesn't Mac OS X "just work" without any intervention on our part?

— [Yes!

But...

— [Apple installs 15+ additional language packs by default for most Apple apps

— [UNIX System logs get bigger every day

— [Universal Binaries take up more room than Intel-only binaries

— [Cache files get really big after awhile

Clean My Mac

— [Scans & recovers space used by non-essential system files, caches, Universal Binaries, unused language translations, log files, more

— [Does a nice job of completely **un-installing** apps you don't want anymore

— [HD space recovered can range from a few Gig to dozens of Gigabytes
