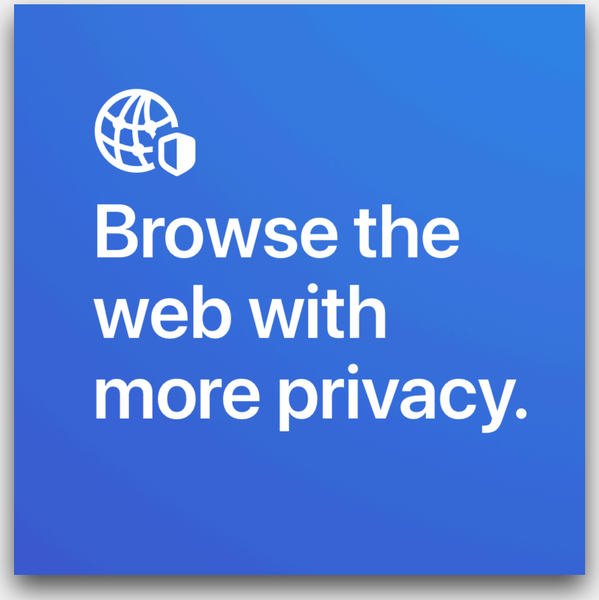
iCloud Private Relay

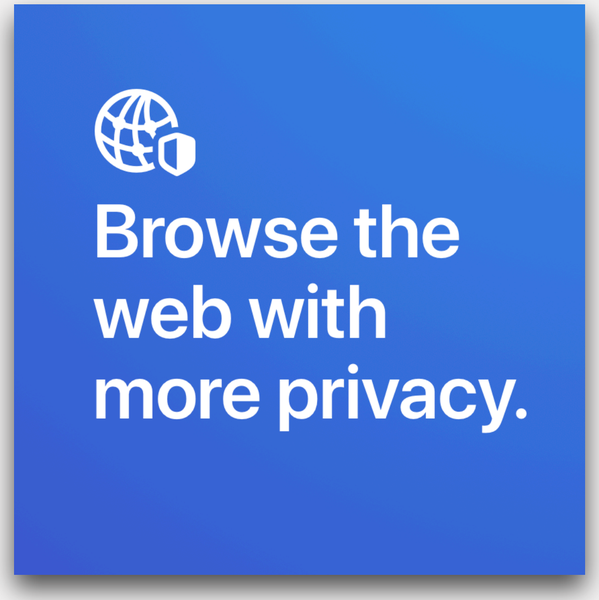
Keep your browsing private — without a VPN

iCloud Private Relay



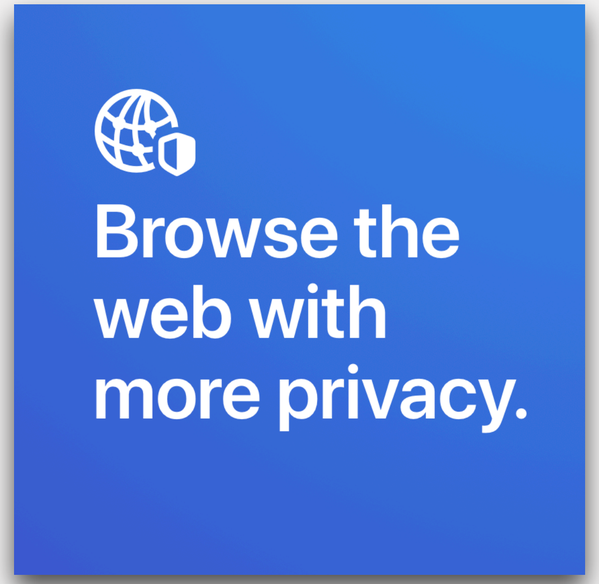
iCloud Private Relay

- Introduced in new iOS 15 and macOS Monterey

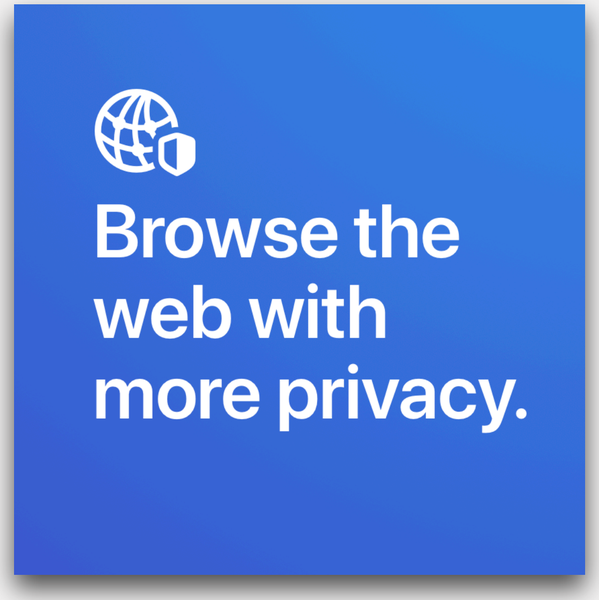


iCloud Private Relay

- Introduced in new iOS 15 and macOS Monterey
- Available with any **PAID** iCloud plan as part of iCloud+



iCloud Private Relay



- Introduced in new iOS 15 and macOS Monterey
- Available with any **PAID** iCloud plan as part of iCloud+
  - You also get Hide My Email (demo'd at our last meeting) and HomeKit Secure Video Storage

iCloud Private Relay

Requirements

iCloud Private Relay

Requirements

- Any Mac running macOS 12 Monterey

iCloud Private Relay

Requirements

- Any Mac running macOS 12 Monterey
- Any iPad or iPhone running iOS 15 or iPadOS 15

iCloud Private Relay

Requirements

- Any Mac running macOS 12 Monterey
- Any iPad or iPhone running iOS 15 or iPadOS 15
- Any **PAID** iCloud account: iCloud+

iCloud Private Relay

Requirements

- Any Mac running macOS 12 Monterey
- Any iPad or iPhone running iOS 15 or iPadOS 15
- Any **PAID** iCloud account: iCloud+
  - Paid plans start at $0.99/month for 50Gb of iCloud storage

iCloud Private Relay

Requirements

- Any Mac running macOS 12 Monterey
- Any iPad or iPhone running iOS 15 or iPadOS 15
- Any **PAID** iCloud account: iCloud+
  - Paid plans start at $0.99/month for 50Gb of iCloud storage
  - $2.99/month: 200Gb iCloud storage + Family Sharing

Keeps Your Browsing Private, *Without* a VPN

Keeps Your Browsing Private, *Without* a VPN

- As a refresher, a VPN — Virtual Private Network — is a way to connect your device to a remote server using a special kind of encrypted protocol called a “tunnel,” as if you had a dedicated wire connecting you to that server

Keeps Your Browsing Private, *Without* a VPN

- As a refresher, a VPN — Virtual Private Network — is a way to connect your device to a remote server using a special kind of encrypted protocol called a “tunnel,” as if you had a dedicated wire connecting you to that server
- They were invented initially to let remote office workers connect securely to the corporate networks or mainframes back at HQ, without the expense of a “dedicated T1 line”

Keeps Your Browsing Private, *Without* a VPN

- As a refresher, a VPN — Virtual Private Network — is a way to connect your device to a remote server using a special kind of encrypted protocol called a “tunnel,” as if you had a dedicated wire connecting you to that server
- They were invented initially to let remote office workers connect securely to the corporate networks or mainframes back at HQ, without the expense of a “dedicated T1 line”
- Now they are touted as “must-haves” to “keep you secure and your browsing private” by hundreds of VPN providers

Keeps Your Browsing Private, *Without* a VPN

- As a refresher, a VPN — Virtual Private Network — is a way to connect your device to a remote server using a special kind of encrypted protocol called a “tunnel,” as if you had a dedicated wire connecting you to that server
- They were invented initially to let remote office workers connect securely to the corporate networks or mainframes back at HQ, without the expense of a “dedicated T1 line”
- Now they are touted as “must-haves” to “keep you secure and your browsing private” by hundreds of VPN providers
- At our meeting on May 25, we learned about VPNs and why you probably don’t need one or want one

No VPN

This part of your connection is probably protected by the VPN’s “secure tunnel,” but really, there’s no way for you to tell.
This part is definitely NOT protected by the VPN’s “secure tunnel.”

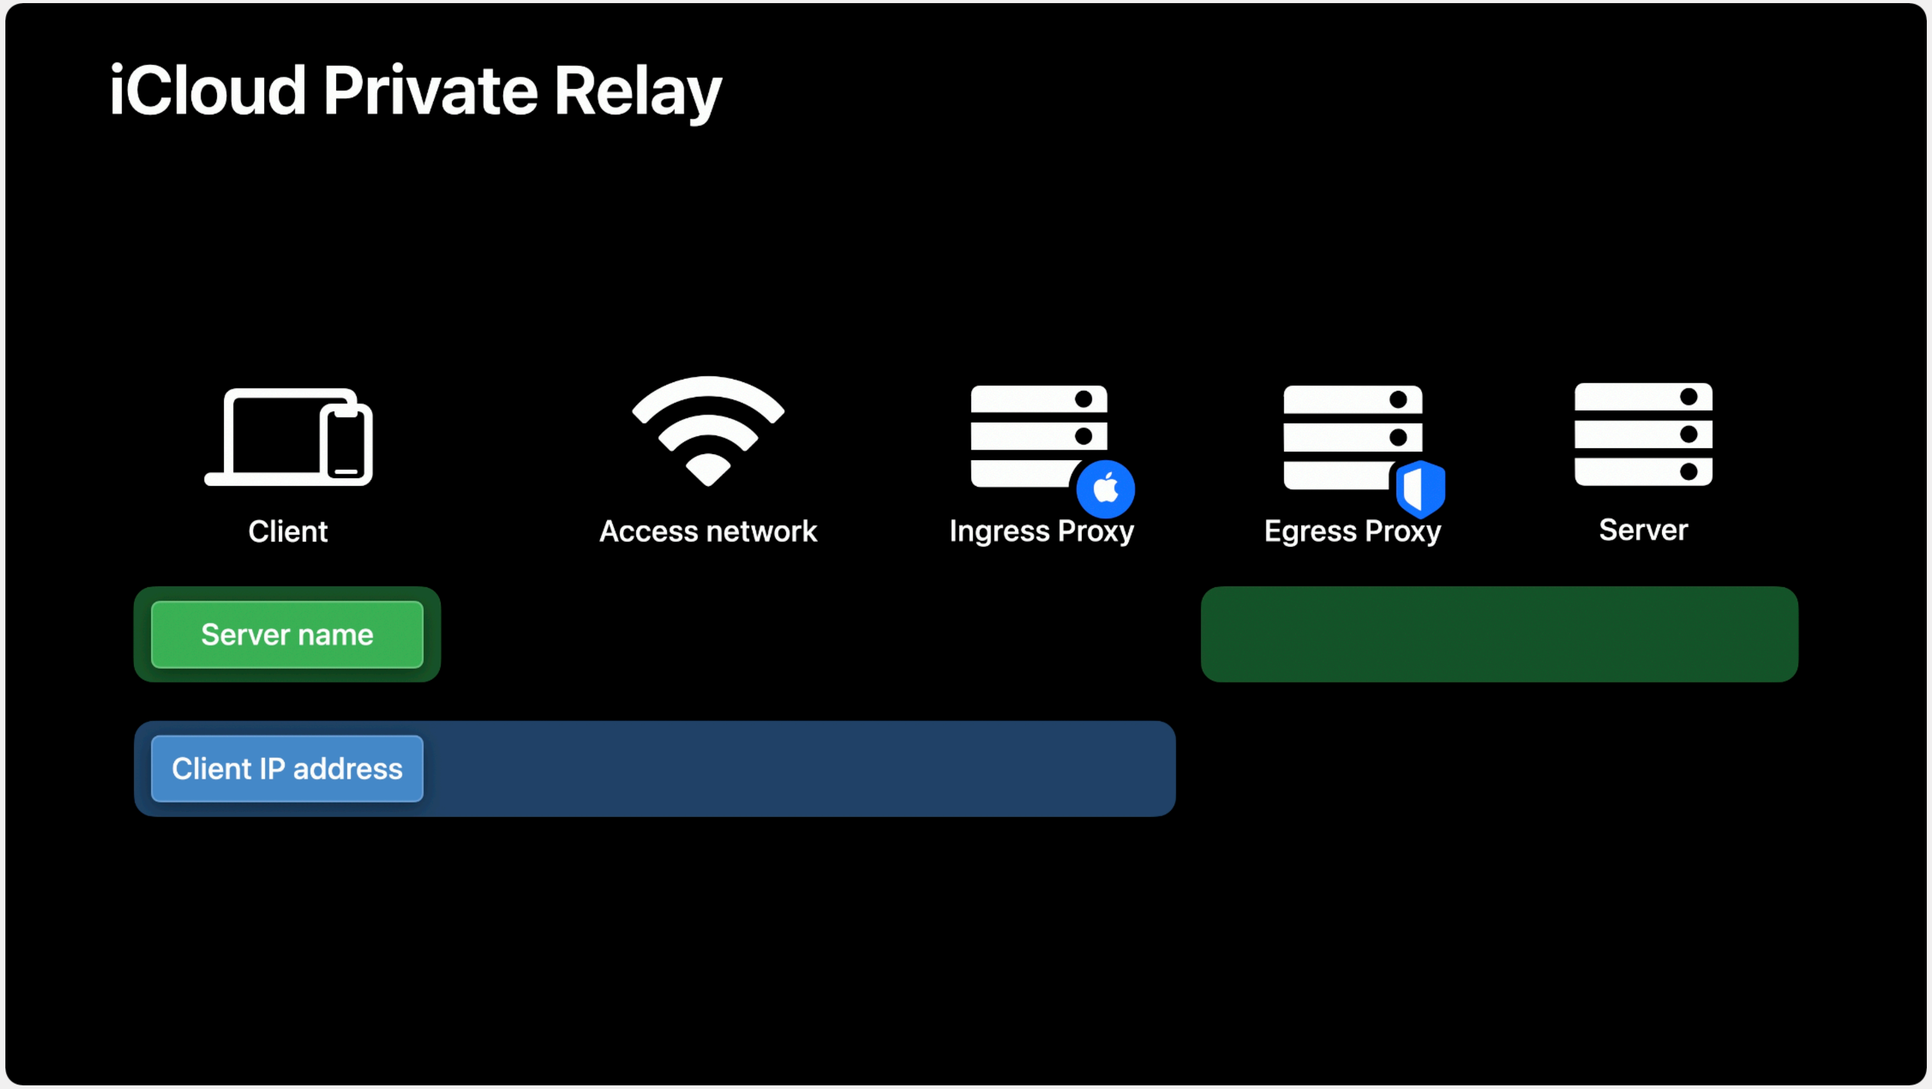
iCloud Private Relay

How it works in a teensy-tiny nutshell

iCloud Private Relay

How it works in a teensy-tiny nutshell

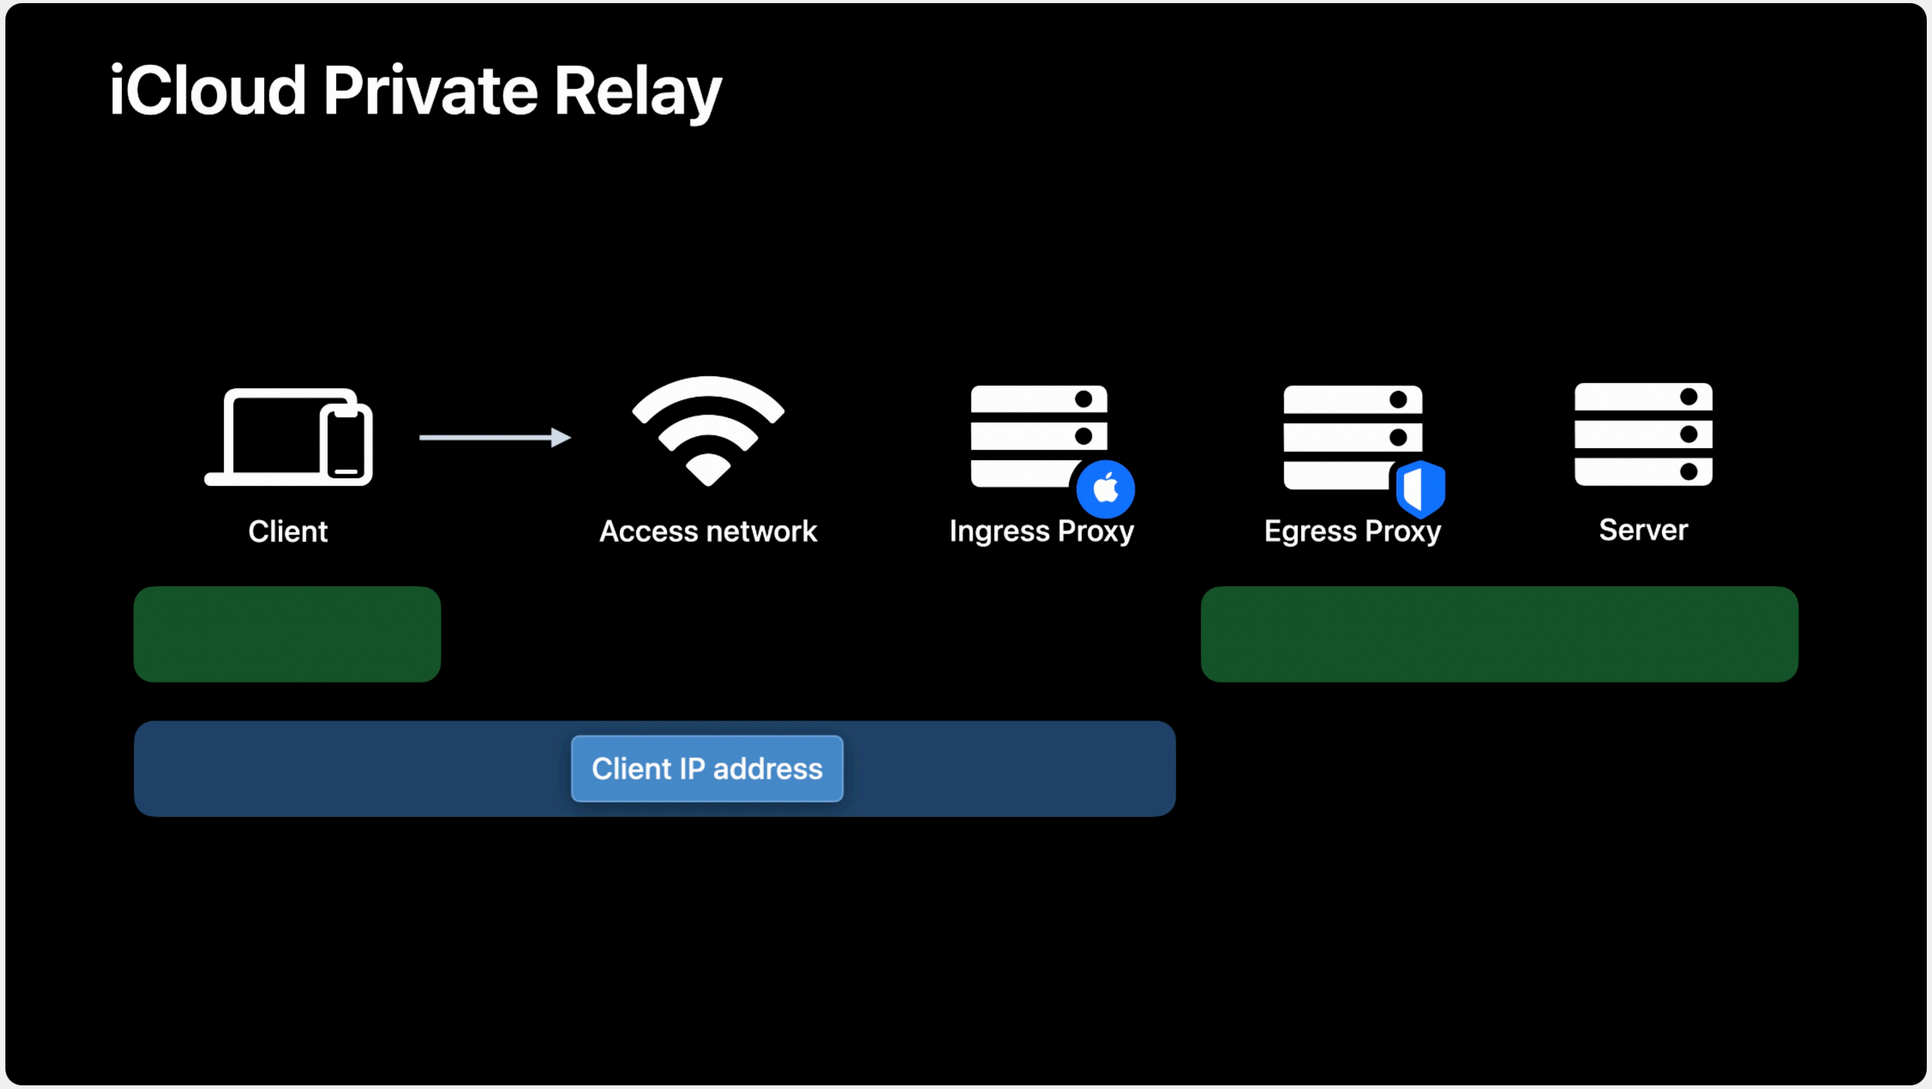
- Your request is encrypted and sent through your ISP to an Apple-run “ingress proxy.”



iCloud Private Relay

How it works in a teensy-tiny nutshell

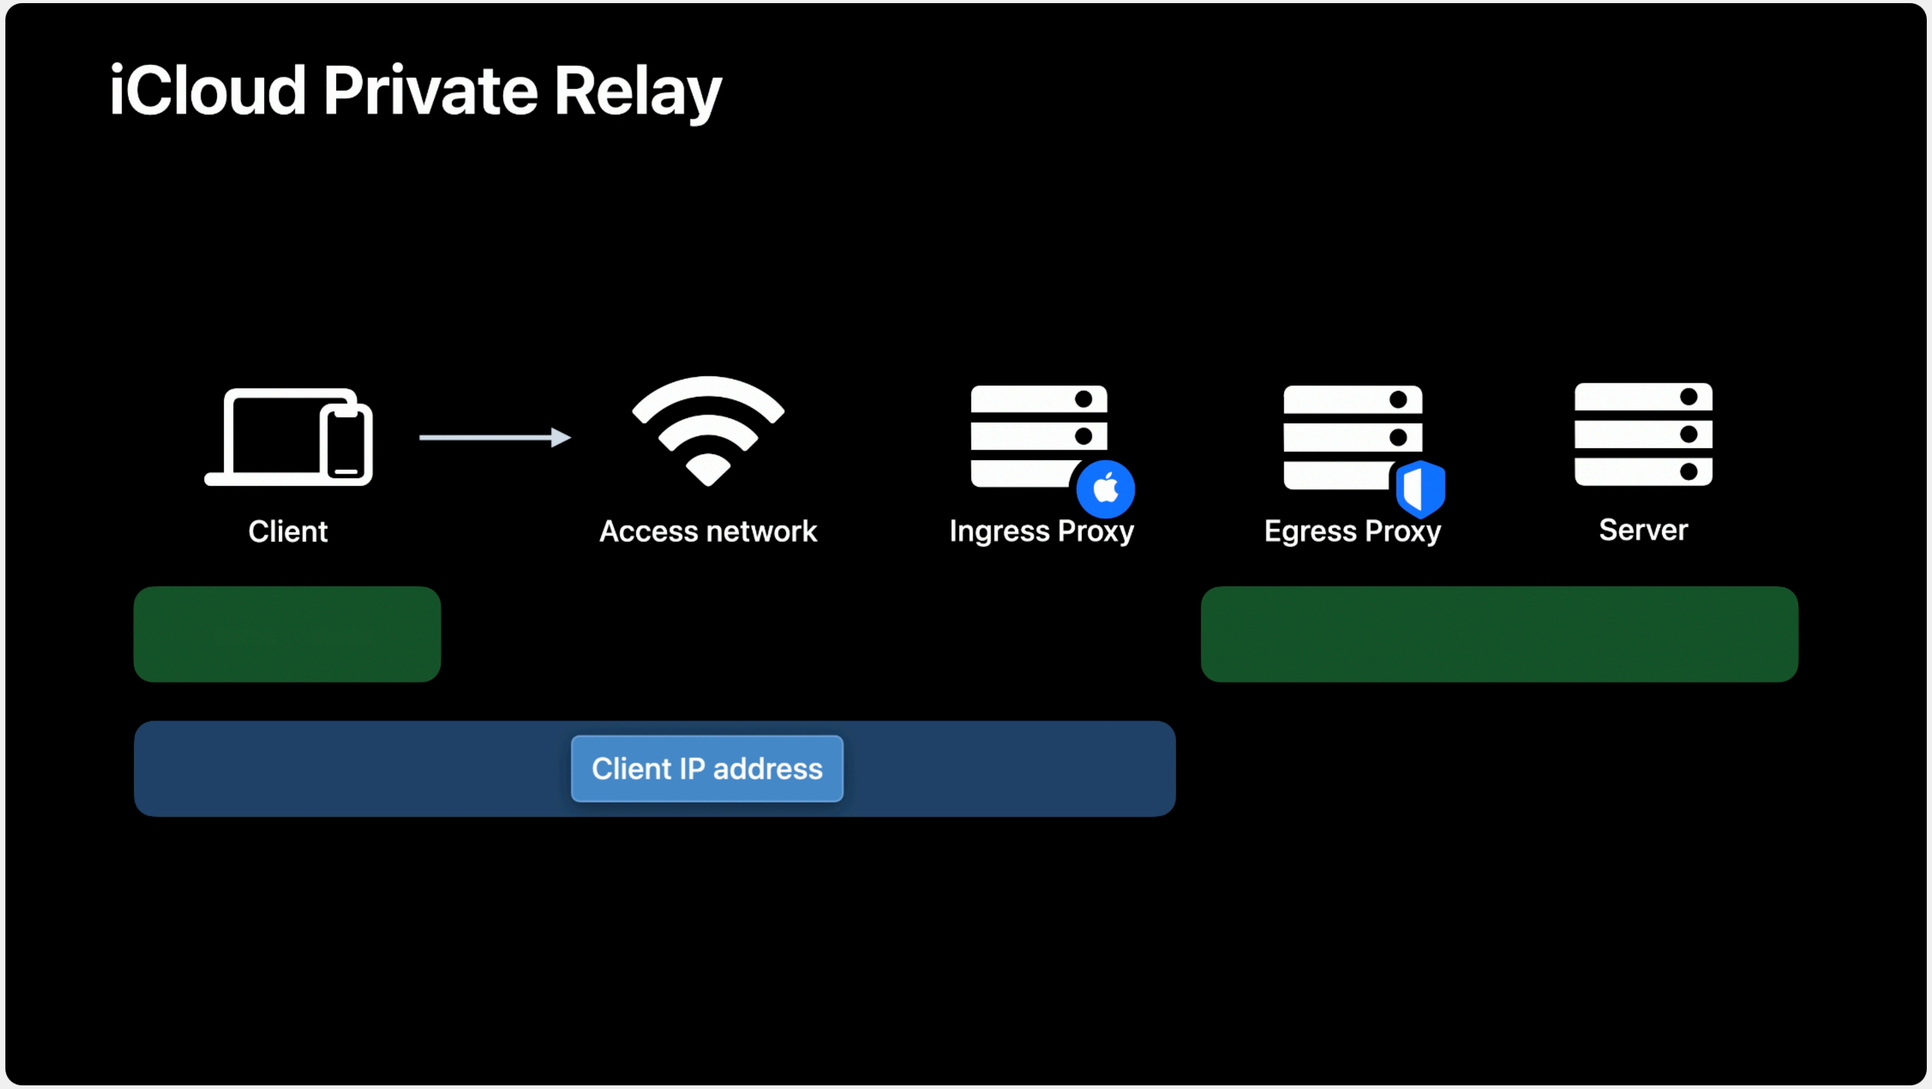
- Your request is encrypted and sent through your ISP to an Apple-run “ingress proxy.”



iCloud Private Relay

How it works in a teensy-tiny nutshell

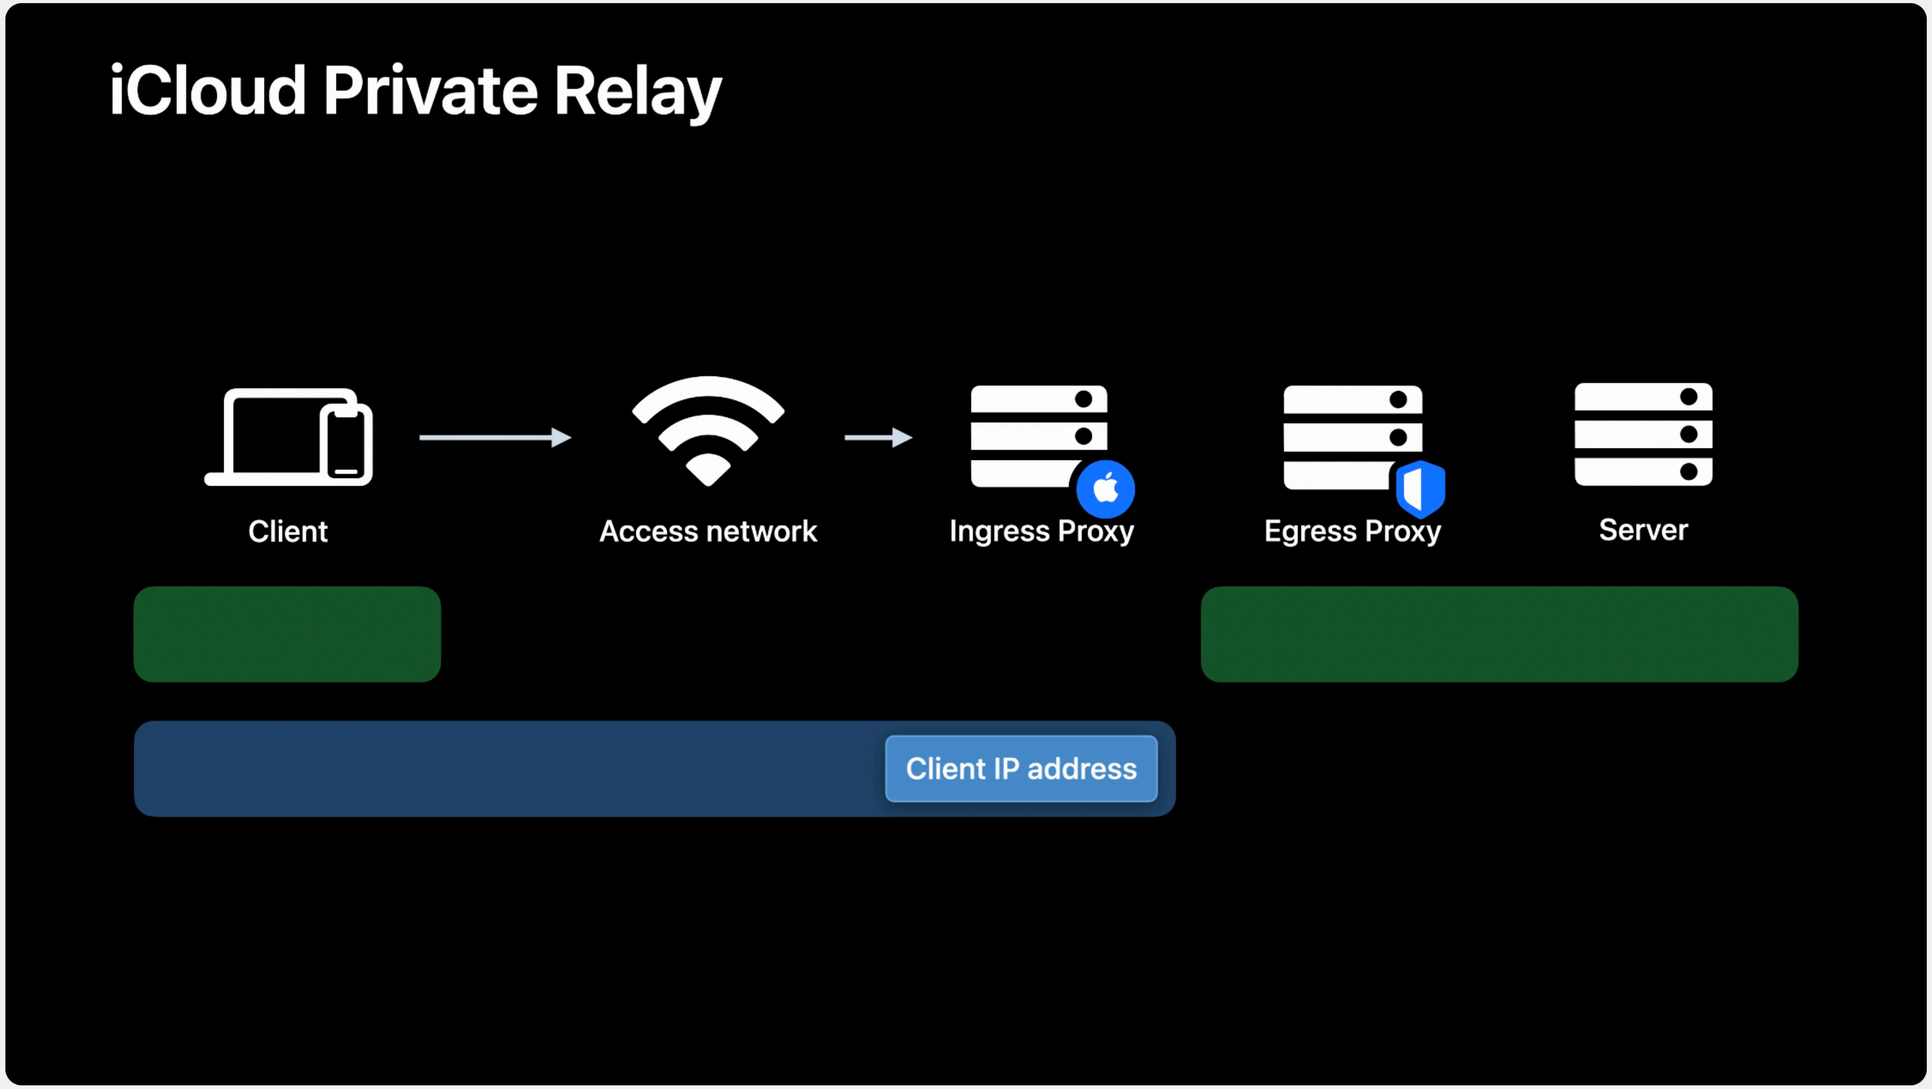
- Your request is encrypted and sent through your ISP to an Apple-run “ingress proxy.”
- Apple & your ISP do not know what website you want to visit, only your IP address



iCloud Private Relay

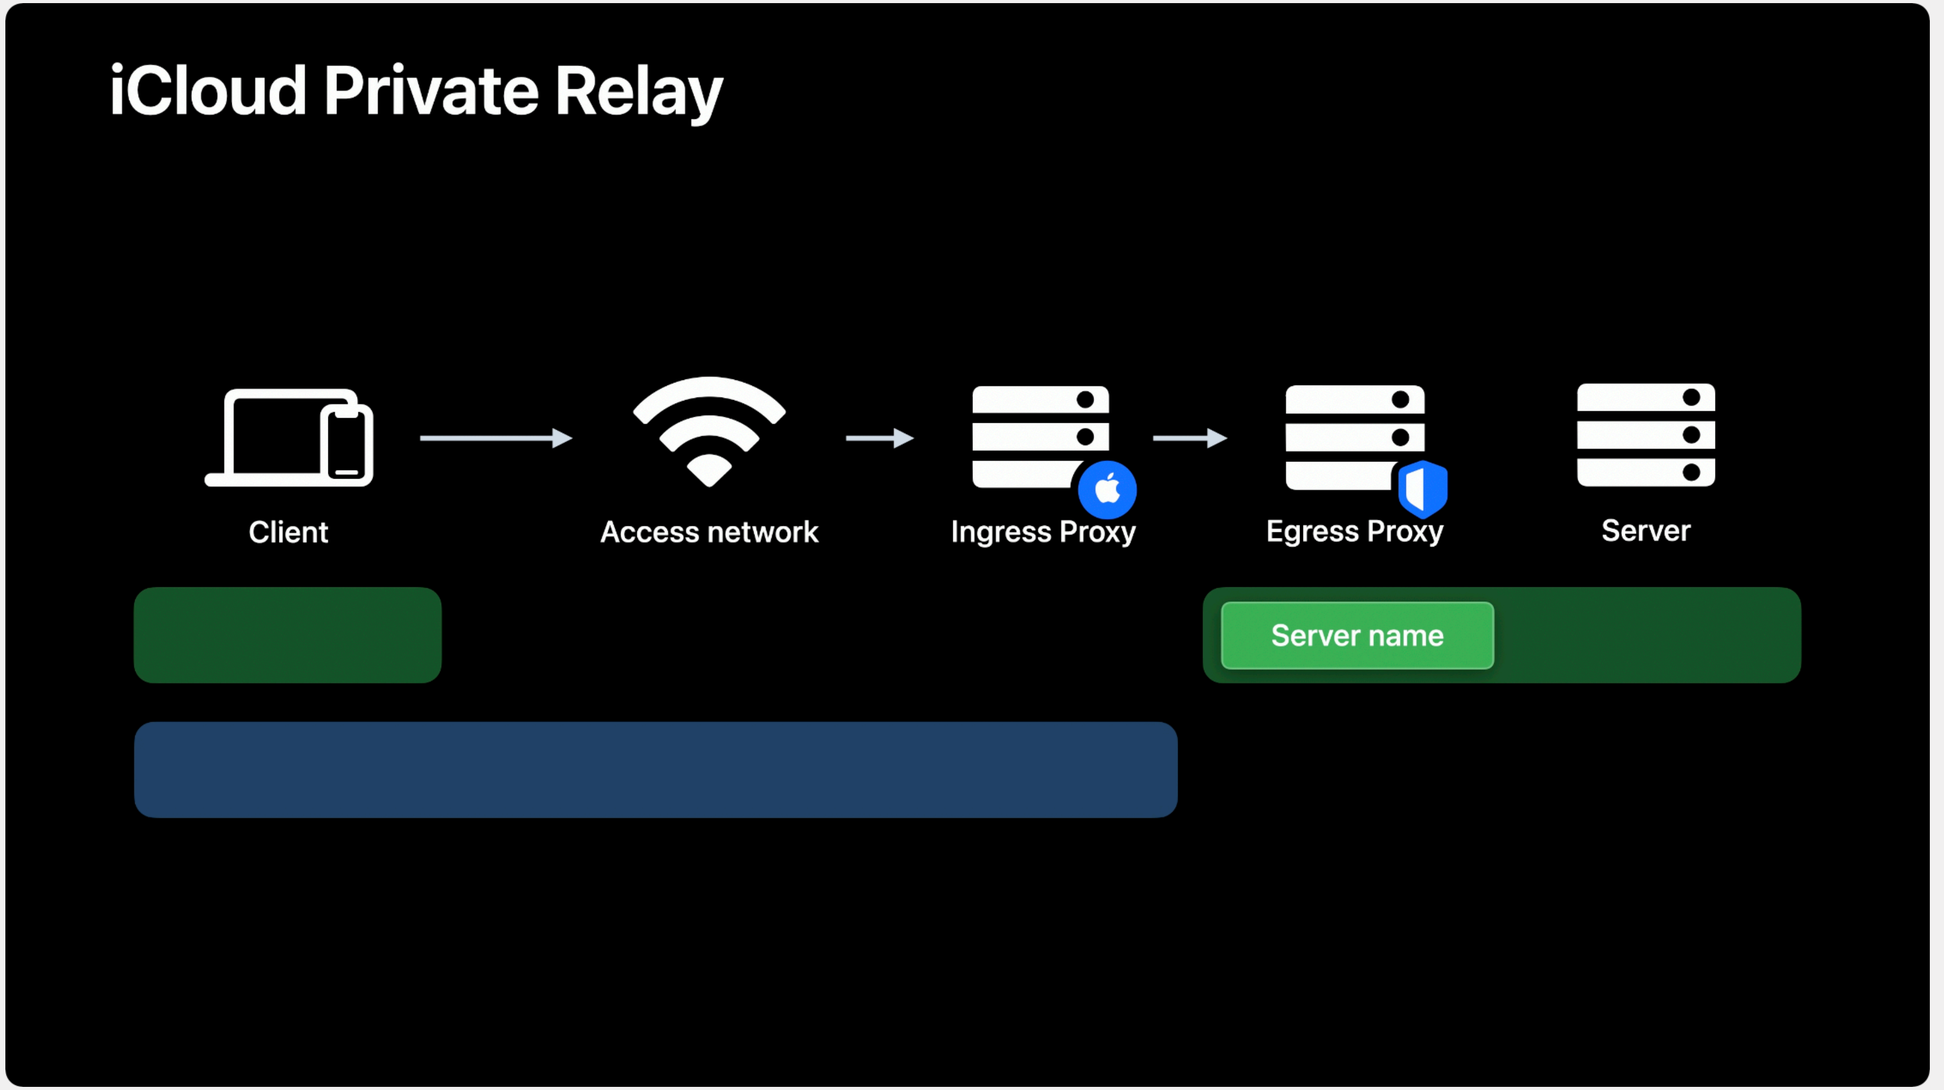
How it works in a teensy-tiny nutshell

- Your request is encrypted and sent through your ISP to an Apple-run “ingress proxy.”
- Apple & your ISP do not know what website you want to visit, only your IP address



iCloud Private Relay

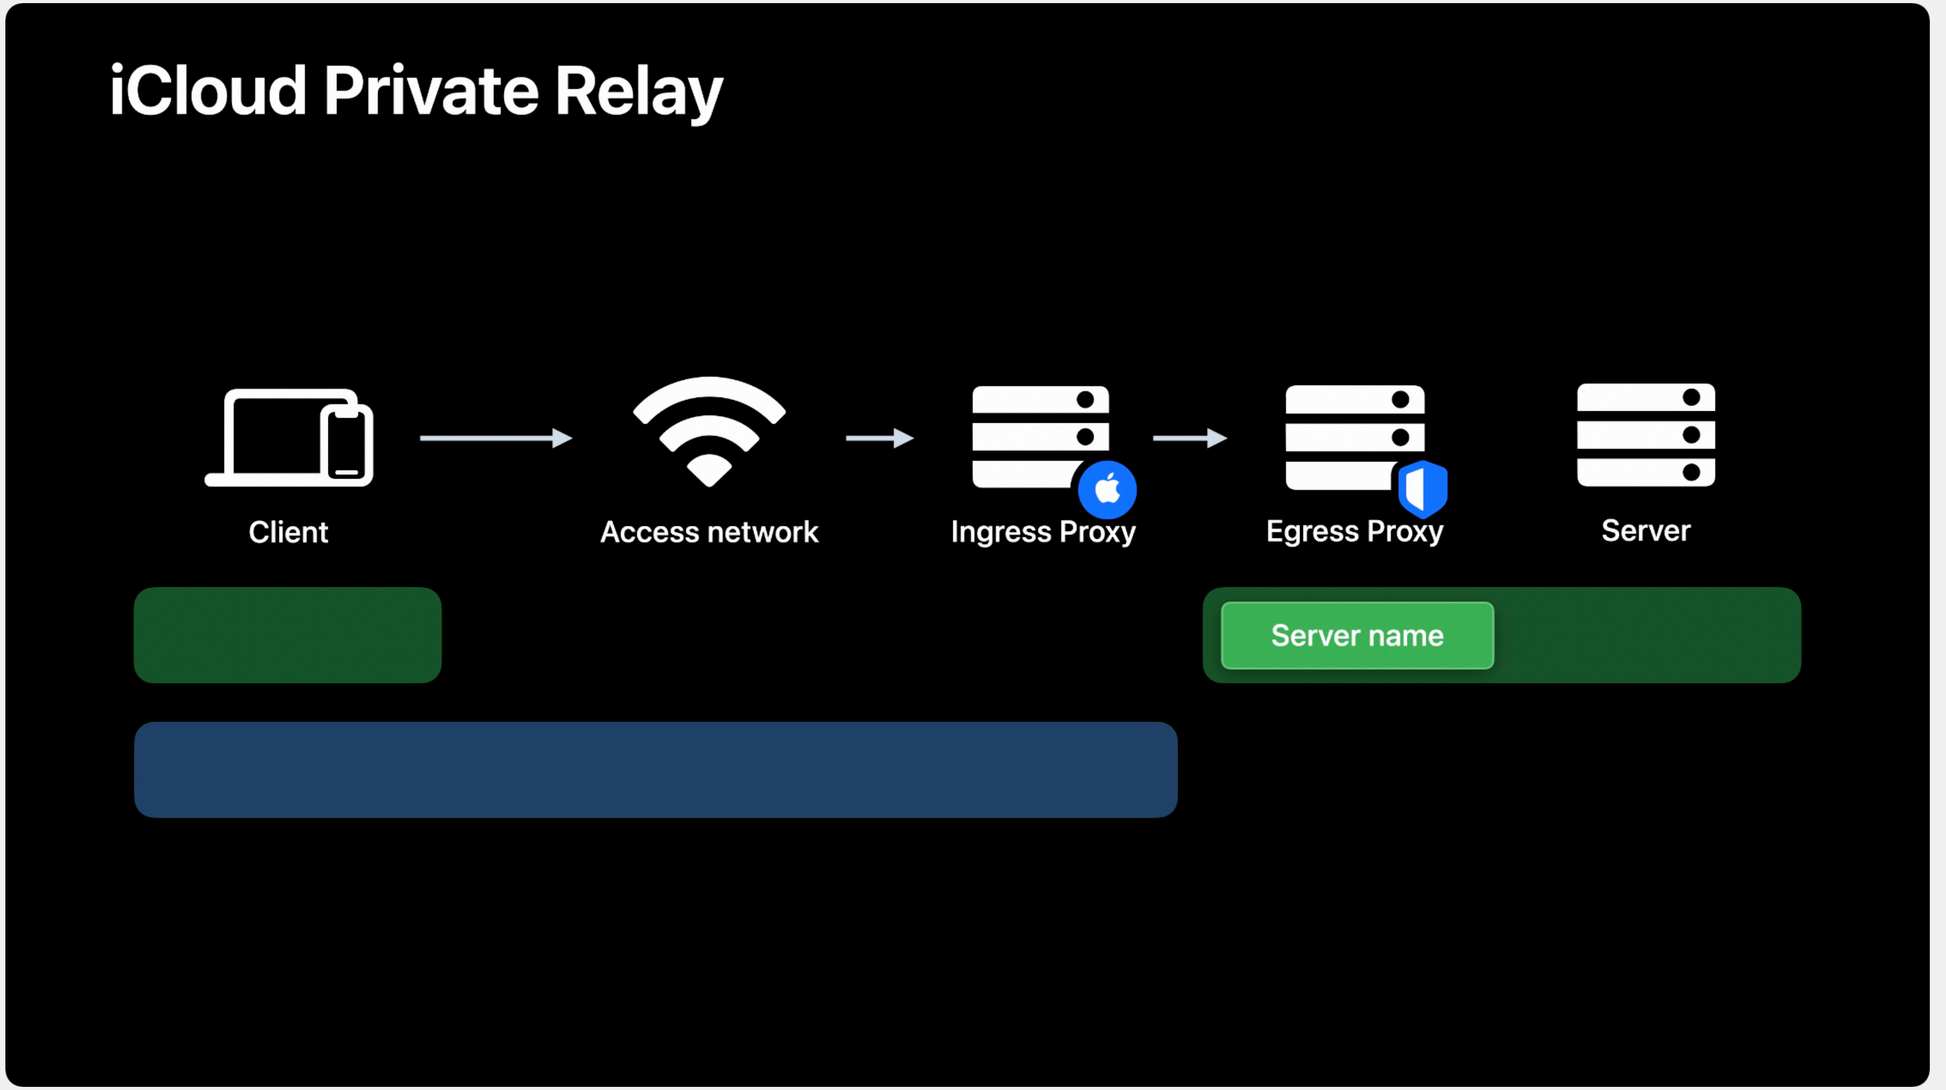
How it works in a teensy-tiny nutshell



iCloud Private Relay

How it works in a teensy-tiny nutshell

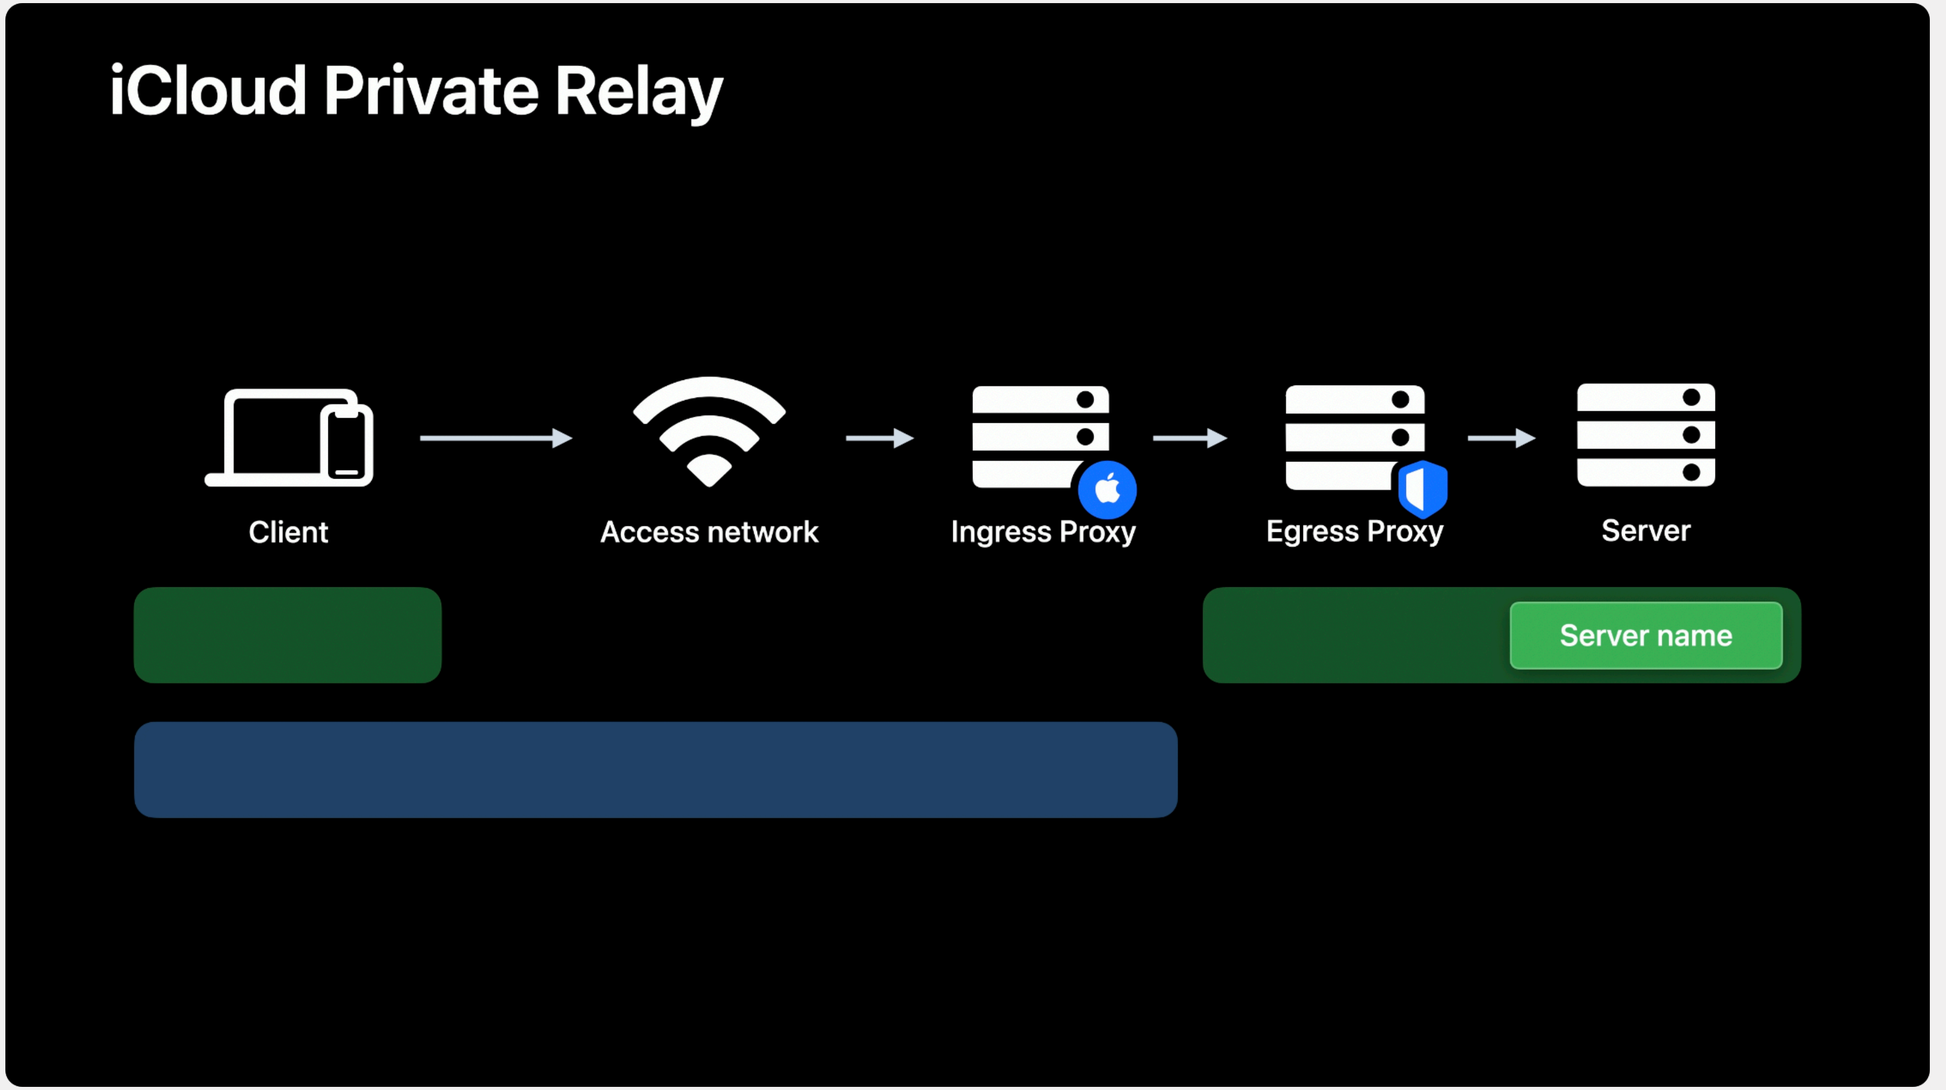
- A separate “egress proxy,” run by a trusted 3rd-party, routes your traffic to and from the website you’re visiting



iCloud Private Relay

How it works in a teensy-tiny nutshell

- A separate “egress proxy,” run by a trusted 3rd-party, routes your traffic to and from the website you’re visiting
- The egress proxy does not know your IP address, only the site you want to visit



iCloud Private Relay

“Zero trust” privacy

iCloud Private Relay

“Zero trust” privacy

- Neither Apple, your ISP or the 3rd-party egress proxy knows ***both*** your IP address ***and*** the site you want to visit

iCloud Private Relay

“Zero trust” privacy

- Neither Apple, your ISP or the 3rd-party egress proxy knows ***both*** your IP address ***and*** the site you want to visit
- None of the parties have both pieces of the puzzle & cannot tell what site you’re visiting ***and*** who you are (your IP address)

iCloud Private Relay

“Zero trust” privacy

- Neither Apple, your ISP or the 3rd-party egress proxy knows ***both*** your IP address ***and*** the site you want to visit
- None of the parties have both pieces of the puzzle & cannot tell what site you’re visiting ***and*** who you are (your IP address)
- Your ISP cannot see the name of the websites you’re visiting - **like a VPN can**

iCloud Private Relay

“Zero trust” privacy

- Neither Apple, your ISP or the 3rd-party egress proxy knows ***both*** your IP address ***and*** the site you want to visit
- None of the parties have both pieces of the puzzle & cannot tell what site you’re visiting ***and*** who you are (your IP address)
- Your ISP cannot see the name of the websites you’re visiting - **like a VPN can**
- All traffic is encrypted in transit, and only **you** have the key — not even Apple can decrypt the traffic

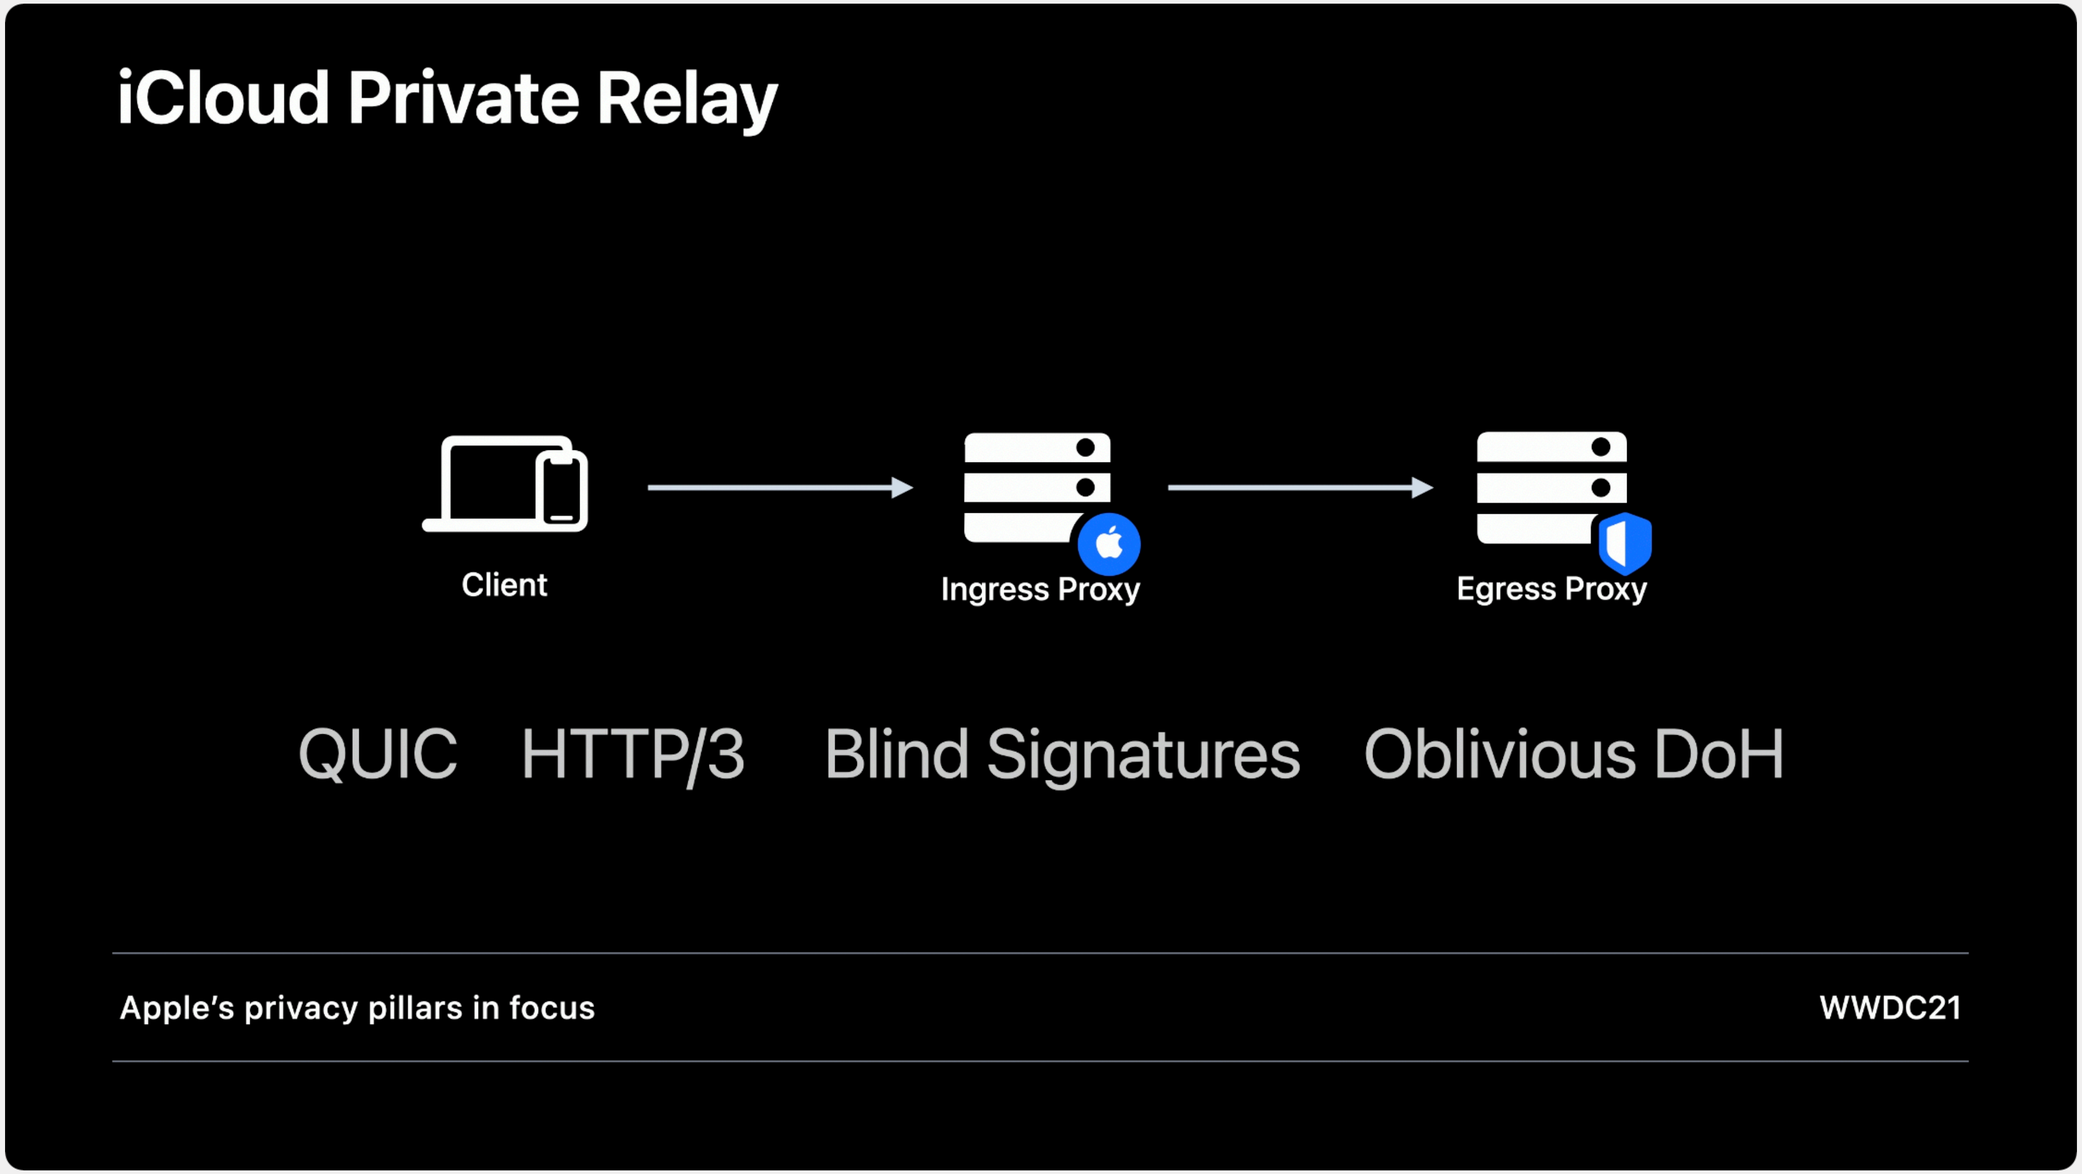
iCloud Private Relay

“Zero trust” privacy

- Neither Apple, your ISP or the 3rd-party egress proxy knows ***both*** your IP address ***and*** the site you want to visit
- None of the parties have both pieces of the puzzle & cannot tell what site you’re visiting ***and*** who you are (your IP address)
- Your ISP cannot see the name of the websites you’re visiting - **like a VPN can**
- All traffic is encrypted in transit, and only **you** have the key — not even Apple can decrypt the traffic
- Does not rely on trust — it’s privacy by **design - *unlike a VPN***

iCloud Private Relay

Lots of nerdy plumbing under the hood



Years in the making, built by giant brains

But for us, “it just works”

Years in the making, built by giant brains

But for us, “it just works”

- Apple, worldwide internet standards bodies, security researchers and internet technology companies have spent decades developing all the protocols and technologies in Private Relay

Years in the making, built by giant brains

But for us, “it just works”

- Apple, worldwide internet standards bodies, security researchers and internet technology companies have spent decades developing all the protocols and technologies in Private Relay
- Apple is the first company to bundle them all up in this way, providing a reliably secure, standards-compliant, transparent option for users who choose to keep their browsing private

Years in the making, built by giant brains

But for us, “it just works”

- Apple, worldwide internet standards bodies, security researchers and internet technology companies have spent decades developing all the protocols and technologies in Private Relay
- Apple is the first company to bundle them all up in this way, providing a reliably secure, standards-compliant, transparent option for users who choose to keep their browsing private
- Apple has published many technical papers and developer documentation on how all this works — and the reviews are good

You Can Help Keep Our Club Fun and Healthy

Our club is **100% donor-funded** by those who enjoy the Cove Apple Club and want to keep the fun going. If that sounds like you, we'd really appreciate your support -- in any amount, anytime, and by any method -- to help us pay the bills and keep the Club fun and hassle-free.

YOUR donation -- as little or as much as you're comfy with -- keeps the Club fun and healthy for everyone, and if everyone just gives a little bit a few times a year, our money needs will be easily under control.

To make donating easy and safe, we've set up ***secure***, easy ways for you to donate online, right from your Mac or iPhone, using Zelle, PayPal or Venmo.

See complete details and step-by-step instructions for each method on the Donate page **on the Club website.** Or just hop on over to **CoveAppleClub.com/donate**. If you'd rather mail a check, email info@coveappleclub.com for instructions on how you can do that.
